SUPPLEMENTARY INFORMATION: The Las Vegas and Pahrump Field Offices Draft RMP/Draft EIS would replace the existing 1998 Las Vegas Field Office RMP. The Draft RMP/Draft EIS was developed through a collaborative planning process. The Las Vegas and Pahrump Field Offices Draft RMP/Draft EIS decision area encompasses approximately 3.1 million acres of public land administered by the BLM Southern Nevada District in Clark and Southern Nye counties, Nevada. It does not include private lands, State lands, Indian reservations, Federal lands not administered by BLM or lands addressed in the Red Rock Canyon National Conservation Area RMP (2005) and Sloan Canyon National Conservation Area RMP (2006).

The Las Vegas and Pahrump Field Offices Draft RMP/Draft EIS includes goals, objectives and management actions for protecting and preserving natural resources which includes air quality, soil and water resources, vegetation, fish and wildlife, special status species, wild horses and burros, wildland fire management, cultural and paleontological resources, visual resource values, and lands with wilderness characteristics. Multiple resource uses are addressed which include management and forage allocations for livestock grazing; delineation of lands open, closed, or subject to special stipulations or mitigation measures for minerals development; recreation and travel management designations; management of lands and realty actions, including delineation of avoidance and exclusion areas applicable to rights-of-ways (ROWS), land tenure adjustments, and solar and wind energy development. The planning effort will consider establishment of a national trail management corridor for the congressionally-designated Old Spanish National Historic Trail. Eligible river segments will be evaluated for suitability as components of the National Wild and Scenic River System and 23 new Areas of Critical

Environmental Concern (ACECs) are proposed. The ACECs are proposed to protect natural and cultural resource values and traditional Native American use areas.

The Draft RMP/Draft EIS analyzes four management alternatives. Alternative 1 is the No Action Alternative, which is the continuation of current management in the existing 1998 RMP, as amended. This alternative describes the current goals and actions for management of resources and land uses in the planning area. The management direction could also be modified by current laws, regulations, and policies. Alternative 2 emphasizes the protection of the planning area's resource values while allowing commodity uses consistent with current laws, regulations, and policies. Management actions would emphasize resource values such as habitat for wildlife and plant species (including special status species), protection of riparian areas and water quality, preservation of ecologically important areas, maintenance of wilderness characteristics, and protection of scientifically important cultural and paleontological sites. Access to and development of resources within the planning area could occur with intensive management and mitigation of surface-disturbing and disruptive activities. Alternative 3 emphasizes a balance between resource protection and resource use, which provides opportunities to use and develop resources within the planning area while ensuring resource protection. Alternative 4 emphasizes opportunities to use and develop resources within the planning area. It would provide for motorized access and commodity production with minimal restrictions while providing protection of natural and cultural resources to the extent required by law, regulation, and policy. This alternative would largely rely on existing laws, regulations, and policies, rather than special management or

special designations, to protect sensitive resources. The BLM Southern Nevada District's Office preferred alternative is Alternative 3.

Pursuant to 43 CFR 1610.7-2(b), this notice announces a concurrent public comment period for potential ACECs. There are 23 new ACECs proposed in Alternative 2, 20 new ACECs proposed in Alternative 3, and 4 new ACECs in Alternative 4. The ACECs are proposed to protect natural and cultural resource values and traditional Native American use areas. Alternatives 2, 3, and 4 all propose to remove the ACEC designations from the current Arden Historic Sites (1,443 Acres) and Crescent Townsite (436 acres) ACECs. Some of the existing ACECs are also proposed to be expanded or reduced in Alternatives 2, 3, and 4.
